DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/8/2005 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

5. With regards to claims 1, 14-16, 23-25, 28, and 29, applicant has amended to include a new limitations stating, "wherein first selected devices among the plurality of types of input devices perform similar processes as the input common processing means, and wherein second selected devices among the plurality of types of input devices perform similar processes as the

Art Unit: 2182

input variable processing means.” Applicant has suggested that enabling disclosure for this amendment lies on pages 24-25. Examiner respectfully disagrees. It is not found anywhere in the specification where there is a discussion as to the type of processing done by the input, storage, or output devices. The discussion of the type of processing done is limited to the data processing apparatus being claimed, and omits any substantial discussion of the processing done by the devices connected thereto.

6. Claims 2-13, 17-22, 26, and 27, are rejected for incorporating the same non-enabled subject matter of the independent claims upon which they depend.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. The term "similar" in claims 1, 14-16, 23-25, 28, and 29 is a relative term which renders the claim indefinite. The term "similar" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unlikely that the processing of the input, output, or storage device could be similar if only the I/O processing included some sort of noise reduction, which is a defined type of common processing. It is well known that a certain amount of noise filtering is done in the connections to most integrated circuits. The level of similarity required is therefore unclear, as it would seem that nearly all devices connected would perform processing similar to at least one type of input, output, or storage common processing.

Art Unit: 2182

10. Claims 2-13, 17-22, 26, and 27, are rejected for incorporating the same non-enabled subject matter of the independent claims upon which they depend.

11. No art rejection is being made at this time in light of the previous objections and rejection.
